What aspects of this tutor's approach to teaching best helped your learning?

- Apart from having so much knowledge on the course's content, they were really great at explaining concepts and how we could use them in order to answer questions we had. Sometimes explained it to us like we were in primary school BUT we needed that method of teaching because some concepts were really hard to wrap our heads around. So simplifying the concepts and relaying it in a way where we could understand better was amazing.
- Ryan was very nice and approachable. I struggled with this content and he never seemed to judge my lack of understanding of what I assume is basic physics topics. He also stay behind to help my group wrap our heads around the mystery planet 2 subject which helped us figure it out a lot faster than we would've if we were left to it.
- was knowledgeable and communicated well
