Comments Report

My tutor...

What aspects of this tutor's approach to teaching best helped your learning?

- explanation using a white board and step by step process

- Ability to explain things in multiple different ways to clarify understanding

- Absolutely loved having Ryan every Monday morning. He always explained the content clearly and shower us how it related to the assessable content, which allowed me to understand why I was learning it and what I should be paying attention to. 10/10

- Always willing to answer my questions, even if i had to repeat myself, very patient and understanding. Also very fun

- Approachable, and always keen to help their students in any way that they can

- Approachable, friendly, and very helpful. Thank you!

- Both Ryan and Mragank were very helpful, in giving tips about how to manipulate models that I'd not seen before.They were friendly and I felt that we established a good rapport during the semester.

- Didn't make me feel like I couldn't ask questions, or that they were dumb. He was really willing to help.

- Enthusiasm and explaining simple concepts well.

- Explained difficult concepts very well and easy to understand.

- Explained things thoroughly and more than once if needed

- Friendly and open, pretty good at explaining how mistakes were made/how to approach the mistakes made by me.

- Good at explaining concepts

- Great at explaining concepts in a simple and comprehensive way.

- Group advice or feedback for some difficult tasks were very useful. Gave feedback in detail and answered the question step by step for better understanding.

- He explained concepts and answers in a very clear and understandable way, making sure I was able to completely grasp the topic.

- He knew the course inside and out which meant he could answer pretty much any question we asked him.

- He tried to make everything relatable and easy to understand.

- He walked around the room occasionally to check if we needed help

- He was friendly and approachable.

- He was very approachable and answered every question we had so that I understood it.

- He was very clear in his explanation of difficult concepts

- He was very friendly and nonjudgmental. When asked he explained concepts in as much detail as possible.

- He was very helpful in answering all questions and explained his answers in an easy to understand way

- He was very willing to explain step by step of concepts. He was also willing to take the time to ask questions and ensure I fully understood what I was doing and was very easy to approach.

- He would set aside the time to personally assist an individual and would make sure that they fully understood the task that was required of them.

- Helped answer any questions I had

- Helped when needed and created an inclusive environment

- Helped with explaining some calculations and logic behind a few formulas

- Him going through examples on the board to assist with answering questions.

- His approachability. Did not seem too distant to us.

- His friendliness encouraged me to give everything a crack.

- His knowledge of python was most useful in aiding oneself to complete difficult problem, along with certain math problems.

- I like how he has very humanised and assured us that no question is a dumb question. Keep him in a job!!!

- I liked how he explained concepts in small groups and visually did this on the white board, he also came around a lot and made sure that everyone understood the concepts.

- I thought he was a pretty cool guy. He definitely had answers to any scie1000 question I could muster up. Definitely an approachable guy, good for conversation as well.

- In Ryan's approach to teaching I liked how he was very approachable and kind. He was very good at explaining things and made sure that we all understood if we were having trouble with some of the questions.

- Light hearted approachable demeanour but with solid knowledge base.

- Made sure that you understood the concept before you moved on. Explained in depth if you asked questions. Friendly and didn't feel uncomfortable asking for help.

- Really takes his time explaining things I don't understand. His use of the whiteboard helps because I am a visual learner. Good at simplifying code in a way I can actually understand.

- Relatable teaching style
  Didn't make content too hard to follow
  Provided actual responses to questions
  Good engagement

- Ryan is able to step by step take me through the problems and help me understand complicated problems. I appreciate his patience.

- Ryan is good at teaching content and a good bloke

- Ryan was always very helpful in explaining concepts during the workshop, being able to explain advanced content in detail in just a minute or two. He has the abilities of a fully qualified teacher and wouldn't be out of place as a lecturer in this regard.

- Ryan was extremely approachable and explained things very well. He guided us through explanations, allowing us to work things out ourselves before he told us the answers.

- Ryan was nice, funny, and extremely knowledgeable. Whenever my group and I would encounter an issue, Ryan would aid us in a way that allowed us to better understand it rather than simply giving us the answer. While this was a little troubling sometimes, in the long run, this allowed us hone our own undertsnading of the course.

- Ryan was quite helpful when someone was stuck on a question. He stepped through the solution in simple terms so we understood and often used diagrams to illustrate his point. He helped us arrive at the answer rather than giving us vague advice and not seeing if we ended up with the correct solution.

- Ryan was really patient and understanding and I always feel comfortable to ask him questions

- Ryan's approachability and encouragement in SCIE1000 workshops was greatly appreciated. This made me feel more comfortable to ask him for help when I was unsure.

- Seems like a really cool guy. Was always very cool and always checking in to see that all was good. Legend.

- Slow explanation to questions, using the whiteboard to answer questions and ensured you understood what he said.

- So lovely! very supportive and patient! Really good at explaining things and very personable and lovely!

- Solved the equation on the board. I am someone who has to see something done to learn how to do it

- Strong ability to talk through problems in a sequential way, leading students to understanding

- The small group explanations for when a group of people were struggling with a certain topic; not just giving the answer away or being overt or obvious towards the correct answers; having an approachable and friendly nature, making it easier to ask questions and ask for help; the approach towards troubleshooting with students by which the student either solved the problem themselves, or if that was not possible, giving a detailed but simple explanation of the issue and the method by which to fix it.

- They were approachable and provided useful feedback.

- Understanding and spoke problems through with me slowly until I had a clear understanding.

- Very Good

- Very attentive and approachable, I never felt scared to ask a question.

- Very friendly and approachable.

- Very good tutor, spoke engagingly made the workshops enjoyable was able to help with both course related content but also other university related course information and the like.

- Very helpful

- Very knowledgable

- Very knowledgeable on the topic and had great communication skills.

- Very nice and encouraging; gave good hints for python bugs

- Very nice explained things rly well

- Was very friendly, approachable, concise and helpful. Every explanation he provided us with was extremely helpful, shed light on our doubts/uncertainties and corrected us onto the right path. He is a great tutor and I thank him for all the help he has given me.

- While I personally didn't every really need assistance, I found that when Ryan was helping people with content he tried to prompt the correct answer out of the person rather than 'teaching' them. Personally I really like this method because while it can be effective to just teach someone how to do something or take someone though it, by letting them figure it out it achieves the same while also helping to build confidence which I feel is critical in the development of skills.

- Writes on the whiteboard to help me visualise, explains in depth, asks questions to prompt my thinking

- Writing on the whiteboard is engaging.

- approachable, helpful and provided effective explanations

- communication and explanation of questions in the workshop

- easily approachable and knowledgable. really great tutor highly recommend!

- encouraged people to engage with the content and made it fun

- he was approachable and made learning easy

- using whiteboard to explain graphs and calculations

- when students had questions on the same part of the work we were doing he would stop and run through it all with us to make sure we were all on the same page.

What would you have liked this tutor to have done differently?

- .

- Checking up more equally to all students.

- Encouraged group discussion more. (The philosophy tutor did this very well, keeping in mind that philosophy is tailored towards this type of learning).

- He didn't confirm whether he was an npc or not. Maybe he could of gotten a bit less distracted talking to specific groups.

- He's a great tutor, nothing really to change.

- Hhmmm not much

- Honestly, nothing. I thought Ryan was really good.

- I believe that class explanations would have been very beneficial. This would allow all students to contribute to the class discussion and minimise how many times he has to explain the same thing. I feel like a class discussion would make the lecture content more interesting and engaging.

- I was going to say run through some of the solutions but the worked solutions that are uploaded are really good so maybe just remind us that the worked solutions are there for revision.

- I've not though about what I would like done differently during these workshops.

- Idk

- Just keep doing what you are doing.

- More interactive with the learning

- Multiple people would be struggling with a concept and he wouldn't explain or clarify to the whole class, only the individuals. It would have been valuable to address the whole workshop as most people had the same question.

- N/A (3 Counts)

- Nah everything was pretty good.

- No

- Not Much

- Not his fault there just needs to be either less students in each class or more tutors. If you're stuck it can take awhile for someone to come and help.

- Nothing (3 Counts)

- Nothing :) (2 Counts)

- Nothing at all.

- Nothing he is a good tutor and very fun

- Nothing he was perfect

- Nothing really

- Nothing really.

- Nothing to reccommend.

- Nothing was great

- Nothing!

- Nothing, the tutor delivered the course very well.

- Nothing, was a great tutor!

- Nothing. (3 Counts)

- Nothing. Ryan was charismatic, funny, and smart honesty couldn't ask for a better tutor.

- Should have completed my python assignment for me.

- Sometimes it is hard to get to everyone because everyone wants help.

- Spend equal time with students

- This is probably more of a reflection of the course content and workshop structure in general, but if there are multiple students struggling with the same question it might be helpful to address the class together and provide general help on the question. Not a major problem, but a few times I'd be waiting to ask the same question I'd heard asked several times already. But they were great overall!

- Wear a name badge.

- explained the language of coding more clearly

- nah he was good

- nil

- nil.

- nothing (4 Counts)

- nothing :)

- nothing!

- relates to us really well
